data protection firm

specializing in breakthrough backup and availability solutions

assured recovery™

Who we are

A market-disruptive data protection firm specializing in breakthrough backup and availability solutions

As a pioneer in data backup and recovery, Arcserve understands complex IT challenges better than anyone else. Located around the world, we're expert engineers, customer enthusiasts, and skilled architects of simplicity and ease of use.

What we do

Why Arcserve?

Data protection technology and expertise, solidly built on over five million development hours

Only Arcserve offers a full range of capabilities that allow you to harmonize business expectations with IT service delivery. Because our expertise extends from email archiving and award-winning backup, to cloud-first disaster recovery and high availability, you can be confident in solving any business or IT challenge.

We help companies avoid IT disasters

We bring innovation to a market in painstaking need to remove the challenges of protecting data while maximizing system resiliency. Simply put, we fuel the growth of midsize businesses by safeguarding their data with solutions that uniquely combine enterprise-ready power with the simplicity required by small and overstretched IT teams.

AVOID DISASTERS FROM RANSOMWARE, HUMAN ERROR AND SYSTEM FAILURES

Access mission-critical apps and data in a fraction of the time required by other competitive solutions. Our technology cost-effectively reduces your RTOs and RPOs from hours to just minutes so you achieve near-zero data loss, regardless of the complexity of your infrastructure.

INCREASE IT AGILITY AND PRODUCTIVITY

Reallocate your time from managing backups to focusing on new projects and innovation. Increase agility by synchronizing all aspects of your backup and disaster recovery plan through one pane of glass.

ELIMINATE DISTANCE AS A LIMITATION

70% of data lives outside of corporate data centers. Fully-protect data across any location, anywhere.

COMPLY WITH STRICT DATA REGULATIONS

Easily adhere to compliance and corporate regulations with capabilities built specifically around GDPR, HIPAA, SOX, ITAR and more.

SHRINK YOUR STORAGE FOOTPRINT

Dramatically reduce your data center footprint and associated costs by converging multiple data reduction technologies and IP.

AMPLIFY SAVINGS

Decrease annual IT costs by leveraging one platform that easily scales with your business. Protect to and from any target while optimizing time-to-value through remarkable ease of use.

Better technology yields better results

Underneath its simplicity of design and ease-of-use, our solutions are enriched with high-performance data availability technologies that make managing complex data truly effortless. Our customers get more bang for their buck, and overwhelmingly report Arcserve UDP as easier to use and of higher quality than competitive solutions.

AVOID IT DISASTERS

64% of apps and data fall into mission and business-critical tiers. Avoid disasters with high availability technology and cost-effective direct-to-cloud DRaaS for near-zero data loss.

AMPLIFIED SAVINGS

Save budget and decrease annual IT costs by leveraging one platform that easily scales with your business. On average, customers decrease their TCO by at least 10-20% each year while optimizing time-to-value through remarkable ease of use.

INCREASE IN STAFF PRODUCTIVITY

Free up resources for new projects and innovation by removing the complexity of managing your backup and recovery processes. Customers typically increase their productivity by 50%.

SAVED STORAGE CAPACITY

Converge multiple data reduction technologies and IP. Shrink your data center footprint by up to 95% and enjoy the market's lowest cost-per-protected TB.

Meet our Unified Data Protection (UDP) Solution Suite

One platform for any backup and availability scenario, in any IT infrastructure

Arcserve UDP was designed from the ground up to eliminate the need for multiple point solutions. Instead of bolting together separate products or dealing with forklift upgrades, our customers defend their systems and apps with one solution for long-term storage to high availability. Choose what you need now, and simply add or remove capabilities as your needs change.

HIGH AVAILABILITY

Critical data is accessible in seconds from local, remote, or cloud-mirrored systems

DISASTER RECOVERY

DRaaS provides protection for physical and virtual servers, with support for public and private clouds

BACKUP & RECOVERY

Unified recovery from cloud, disk, and tape delivers modern protection for hybrid environments

EMAIL ARCHIVING

Long-term email archiving offers resiliency for your vital records, reduces storage costs, and simplifies email compliance.

Company

Arcserve is headquartered in Minneapolis, MN with offices around the world.

Customers

Leading global companies like Expedia, Bloomberg, Thomson Reuters and Sony Music rely on Arcserve for infrastructure resiliency.

Expertise

500 development hours fuel a solution suite that creates a frictionless customer experience.

Partner Ecosystem

We partner with 7,500 distributors, resellers, and service providers in 150 countries around the world.
